Introduction

The current situation for the client is the fact that she has no website for showing her products online. Fenia wants to open a gallery/portfolio website to increase the quantity of her customers because people prefer to enter websites instead of calling or reading journals.

Agreements with client

During meeting with the client, she informed us about what she wants from the website, also some problems were discussed:

Main issue

Nowadays, people prefer to use their gadgets for consuming information. That is much better than buying journals or newspaper trying to find what they need. That is why if you don't have a website which tells about you, nobody will know about you. In Fenias case people know her because she shows her art offline in the museums. But the business will go better if we create a website.

Website must include

- Great Greek Love description
- Information about Fenia (general info, other projects, her experience)
- Toys gallery
- Contact form
- Social Media links
- Product Page (photo, general info, price, contact button)

Website should include

- Game for kids
- Version for museums

Website will **not** include

- Login/Register functionality
- Buy functionality

Additional information

- Color pallet (developers' choice)
- Make new logo if possible

Functional Requirements

WB – website functionalities

UC – use case

ID	User should be able to	Actor(s)	Use Cases	MoSCoW
WB-01	Contact Fenia	Website visitor	UC-WB01	Must
